# Storyboard Template

Name: Hyelee Kim
Project: 15-112 Term Project
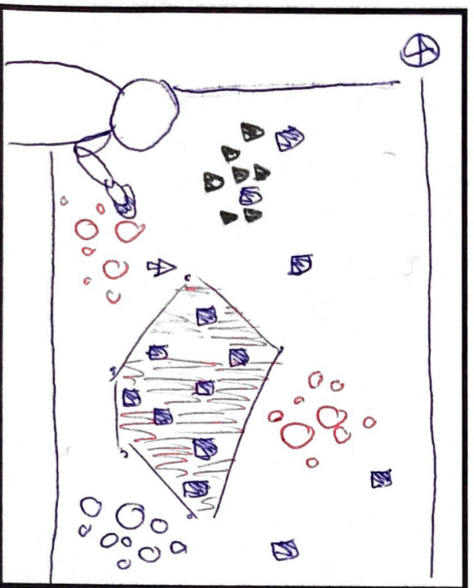

① User can open up "Artificial Ecosystem" and view self-running ecosystem
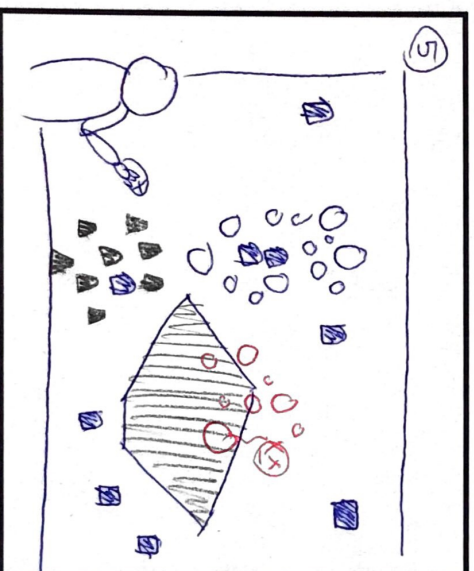

② User can grasp the general logic of ecosystem with hierarchy of species, diet food, and reproduction
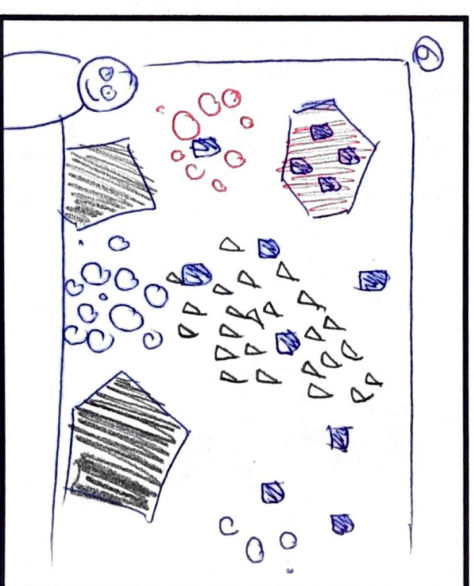

③ User can observe group behaviors of same species: cohesion, avoidance and align.

④ User can interact with the ecosystem by making food generator with mouse click

⑤ User can also delete food generator of placing it or turn it into death-trap

⑥ User can observe how this ecosystem grows according to nature's rules
